

NGUYEN HOANG VIET

AI Engineer Intern

EDUCATION

FPT University

10/2021 - Present

Major: Artificial Intelligence

GPA: 7.1

Le Quy Don High School for Gifted students

9/2018 - 6/2021

-Top 10 high school entrance exams.

-Second prize in science and technology contest

EXPERIENCES

AI-powered system for traffic law violations detection 1/2024-3/2024

https://github.com/nttlyn/Helmets_Detection

-Processing data

-Training a Object detection model using YOLOv8 with custom dataset

-Built a CNN for OCR problem

Distraction detection in a class (Team)

9/2023-11/2023

<https://github.com/nguyen-hoang-viet/Distraction-detection>

-Uses OpenCV, SVM and other algorithms to detect distractions

-Create a website using the trained model

Emotion classification (Team)

9/2023-11/2023

<https://github.com/nguyen-hoang-viet/Emotion-classification>

-Preprocessing data before training

-Use PhoBert model for training

-Create a website using the trained model

Mini projects using Arduino (Personal)

2019

<https://github.com/nguyen-hoang-viet/arduino>

-Learn about Arduino and C++

-Make some exercise and mini projects using Arduino

MY CONTACT

PHONE NUMBER:

0796 556 257
